

DEATH OF A PROFESSIONAL PROGRAMER

I have thought about this clmn for the longest of days. It has, allready been written and read. But I will put it in my own words that are barely adequate to give such an announcement. But I must proceed with the task.

LEMKE SOFTWARE DEVELOPMENT has ceased to exist as we know it even as of this date Stan Lemke, has made his decision, to cease, his business of producing quality professional programs such as the one i am using to produce this, column for our KATS newsletter.

His programs with the exception of the ones he has colloborated, with other persons such as Bill Ferree and Steve Spaulding will be donated to PUBLIC DOMAIN. As of this time I don't have exact, names of these programs.

The reasons for Stan's removal of his business is several fold, one on the top of the list is as we might expect is lack of support from the Community of "T/S 2068" USERS. This is probably the # 1, reason. Even as I write this clmn one of the biggest users groups, told me that they didn't use any of Stan Lemke's Programs! I was, and still am surprized at this, statement! I am sure Stan Lemke, will still support us the way he knows best using his computer and helping his fellow computerists. As the commericats say A Mind is a great thing to waste! And if I know Stan Lemke, he will help out where he can as he has in the past times. I myself have received his very professional help. Members of KAT/S have received his help, in many matters besides his pgms such as buying certain hardware items such as Printers and disk-drives. He even supports other, peoples programs helping members to use thes programs. Yes know-ledge is a great thing and Stan Lemke has a "GREAT PROGRAMMERS" mind! I for one will miss this-- unique legend of Stan Lemke for his epoch has come to an end.

Paul D. Reynolds President KAT/S

The past few meetings have been a bit heated usually the business meeting is quite calm and to the point. But the issue was and is, the method of sending out of the newsletters to members and other exchange clubs. The subject is a method of comparing Ideas. ASCII to Bit Image Graphics method of, storage and transportation their of DATA. So after much debate of this issue I must inform the Club or organization of Sinclink, that it will be impossible to send to you the newsletter on the means, you requested. But we would still like to exchange newsletters on a regular basis.

Else where in the newsletter, is a short notice that we are in a search of several cassettes to add to and complete our T/S2068 cassette library. Included is a part number of the cassette that is in the last catalog from T/S.

Or if anyone has extras that, we might also buy of other hard to find cassette tapes please inform us with both name and part # and a price we can't refuse.

Of course we are open to trade or any other means like cash or, what ever you are in the mood to use. I am using the winter issue to get proper names of each and every cassette and part number.

One of the subjects that comes up all the time in the meetings, is the question of using T/S1000 programs in the T/S2068 machine. Personally just a few of these, can be use in the 2068 because of the different machine code locat-ion the two machines use. Unless you are the Super Programmer of the 80's or perhaps the 90's. The one thing that show's up in the catalog is the programs that are the most usefull is duplicated in both the T/S1000 and T/S2068. Of course their is a few that are contrary to this fact, HEATING-SYSTEM ANALYZER it is that good, of a program? Or perhaps others, that follow in the catalog: SOLAR WATER HEATER DESIGNER: ELECTRIC COST ANALYZER. The one thing that prohibits me, ownership of these cassettes.

One member who is our mainstay in the GAME DIVISION for T/S2068 Randy Cummings, and also our U-P made all of these requests known to me and to possibly get a short paragraph or two on these items, that I listed on the other pages about collecting original T/S2068 programs.

Listed are:

YARD IMPROVEMENT PLANNER
PN: 06-2002
WORD PLAY II
PN: 06-3021
LANGUAGE USAGE
PN: 06-3025
STOCK MARKET SIMULATION
PN: 06-4010

Also he wants to add that great, SEGA hit of all time, licenced, to Sell by CORNSOFT "FROGGER". If any person has or perhaps own a version for the T/S2068 please contact him:

Randy Cummings 124 West 10th
Andover Kansas ZIP 67002

As previously stated and promised the election results of S.N.U.G. have yet to be seen here in KATS land perhaps there is a problem? Because their newsletter has yet to get off the ground they may have a bit of trouble getting out the word of who was elected and, other important news that every-one is waiting on. One of their items was to notify them of our, own dead-line of our newsletter.

One of the signs of being clas sified as an orphan look of less and less persons on our own mail list the membership is just about equal to the list of exchange-of-newsletters list. Of course its a part of the under lying current that is ruining our own organiza tion, but enough of this negative material in this newsletter.

Included in this newsletter as a contest is a KATS BEEPER, one of our own members keeps coming up with these ideas and perhaps, it will continue plus more KATS ICONS to install in your ICONS-MANAGER from Lemke SOFTWARE INC.

This article was reprinted in ZX-APPEAL on pg 16 of April 14/89
The notice below first appeared in the April 1989 issue of the
CCATS newsletter "The PLOTter". It explains what the current
situation of Time Designs Magazine.

Tim Woods, Editor and Publisher of Time Designs Magazine has
announced: "Our Timex Sinclair Magazine is still very much
alive, even though some of our recent issues have been released
late!"

Due to the birth of a new son, Anthony David Woods, during the
Holiday season, both Tim and Stephany Woods, who produce the
computer magazine as a family "hobby" and on a part-time basis,
found a lot of their energy was devoted to the new addition.

Tim commented, " I was sorry to hear that SYNCWARE NEWS, another
Timex publication, has folded. But, understandably, it has
become increasingly difficult for most editors and publishers to
work on a limited time schedule and with a declining user base,
to keep going. I'm not joking when I say that to produce a
newsletter, or magazine of any size is a tremendous amount of
work...a real labor of love! We are re-organizing our efforts
here at TIME DESIGNS to ensure that our magazine is published
for many years to come. I feel it is a worthwhile project."

On the eve of releasing their Forth Anniversary issue, several
changes have been made to improve service to TIME DESIGNS
customers. First of all, the bi-monthly designation of issues
has been dropped. Instead, only a numbering of volume and
issue will be used. For example, "VOLUME 5 ISSUE ONE" will
indicate the upcoming issue (formerly the NOV/DEC '88 issue).

"We just felt it would be redundant for our readers to receive a
winter issue in the springtime. Our customers will get every
issue they have paid for! We will offer subscriptions for both
six and twelve issues. Starting with VOL.5 NO.1 we will continue
to release issues approximately sixty days apart. A lot of
electronic journals are numbered this way, in fact we have always
numbered TIME DESIGNS along with the Bi-monthly designation, so
it shouldn't be too confusing."

Along with this numbering system, some new software will be put
on-line to track subscription accounts. I think our mailing
label and the expiration information was kind of confusing for
some individuals. The new software should alleviate this
problem. Instead of an expiration date, there will be a number
in the upper right-hand corner. This will indicate how many
issues are remaining." (Example: (5) indicates five issues
remaining). TIME DESIGNS readers will also notice a new look, a
new logo, and upgrades to several sections.

"To lighten my own work load, I have arranged for some of our regular contributors to take over whole sections and be completely responsible for their content and appearance. For instance, Stan Lemke and Bill Ferrebee will be collaborating on a regular TS2068 section."

Other sections, including the one for the sinclair QL will get similar treatment. Extensive use of telecommunications (MODEMS) for author submissions will also help to speed up magazine production.

"If anyone has experienced missed issues or similar problems, we want to encourage them to drop us a postcard or note. We also maintain a 24-hour message machine for this purpose (503-824-2658). We will correct the problem, just as soon as we possibly can."

"We have appreciated everybody's patience with some of our delays. Generally, most everyone has been really understanding. Our TIMEX SINCLAIR community is made up of a great bunch of people. In return we will continue to publish a quality magazine."

This concludes the message that was published first in CCATS newsletter "The PLOTter" April 1989 and republished in ZX-APPEAL issue dated April 14, 1989 on the current situation of TIME DESIGNS MAGAZINE.

So armed with this information we can contact TIM WOODS and get our missing and or late back issues. In any case we wish the WOODS family well, and in his endvor to publish and edit a fine magazine much luck. To address other items that concerns the members of KAT/S, some of the newsletters we receive have been shifting their formats to cover other computers in the SINCLAIR line more and more like the QL and the new upstart of the group, Z88 the laptop. A search will be started to contact groups that still use the TS1000 and TS2068 as we do in our computer group.

The club members have been collecting orginial TS 2068 tape or cassette programs:

YARD IMPROVEMENT PLANNER	PART NUMBER	06-2002
WORD PLAY II	PART NUMBER	06-3021
LANGUAGE USAGE	PART NUMBER	06-3025
STOCK MARKET SIMULATION	PART NUMBER	06-4010

If you would let loose of or let us buy it please contact us at the address of the newsletter listed on the back page.

K.A.T.S. USERS GROUP

The "KATS KOMPUTER KNEWS" is the official publication of The Kansas Area Timex Sinclair Users Group. We are a non-profit organization that supports all TIMEX/SINCLAIR Computers.

Membership to KATS USERS GROUP is \$10.00 per year which includes the receipt of the group newsletter "KATS KOMPUTER KNEWS".

Please remit the above to:

PAUL D. REYNOLDS
P.O. BOX 17579
WICHITA, KS 67217

Meetings are held on the second and fourth Tuesdays of each month in the Sedgewick County Courthouse 9th floor at 7:00 PM. Parking is available North of the Courthouse. Please enter and sign in at the the North entrance as required by law. The public is welcome.

For further information please call or write one of the K.A.T.S Users Group Officers listed below:

PRESIDENT

Paul D. Reynolds
